- Sagarmatha Children Home
- New Bal Griha
- Darshan Bal Griha
- Run Nepal
- Family Stofal Foundation
- Bal Kalyan Sangathan
- Surya Sikshya Sadan
- Charlotte's Heaven on Earth

Review

We have a long list of visited orphanages this month, it was a lot of work to do. The feedback and our study outcome varied. There were some orphanages where the children were severely ill. The treatment was underway and they could not participate with us.

Similarly, some orphanages were not aware about the counseling. We had to describe the administration regarding what our objective is and how the children are benefitted. We have given some ideas regarding the matter to them and some have asked for co-operation with our organization. We have responded that we have to make a plan and then do accordingly.

Regarding some orphanages, they were very much organized in terms of infrastructure and the children were also friendly to us. They participated us and enjoyed. They seem to be happy to be with whatever we did for them.

Activities done

- Our introduction and the purpose of the visit was told to the administration
- Introduction to the children
- Gave brief education about mental health
- Children were asked to make drawing and to describe their drawing
- Played some games and some entertainment was done with children
- Finally handed over the materials to the administration

Activities done contd...

- Children were divided into two groups according to their age group
- Introduction of the children
- Gave brief education about what is counseling and who needs counseling to children above the age of ten
- Younger children were asked to make drawing and to describe their drawing
- Played some games and some entertainment was done with younger children
- Interaction about counseling was done with the children above the age of ten

It was convenient that the children were classified according to their age group. 5-10, 10-15 and below 5 was our classification

Thank You!!!!
